Registration: Send an email to webinar2@applusfomentocontrôle.com

On February 1st, 2020, the Ministry of Industry, Trade, Green and Digital Economy of Morocco under the law 24-09 on the security of goods and services, outsourced the control of export of industrial products to the Kingdom of Morocco. The deadline for the transitional period of the Verification of Conformity Program (PVoC) is from February 1st to June 19th, and will be mandatory from June 20th, 2020. **Applus Fomento Contrôle** is one of the companies authorized to issue the Certificate of Conformity (CoC) required by this Program.

This conference organised by Applus Fomento Contrôle in collaboration with **Italian Chamber of Commerce in Morocco** aims to clear up the exporter's doubts concerning the program and to raise practical questions regarding the new regulations.

The regulation divides the products subject to inspection into two lists: 80% of the products will be checked at origin and the remaining 20% will be checked at destination. The control will be classified in 3 Routes, depending on the product and the type of exporter and will consist of: a documentary verification, a physical inspection, and laboratory tests.
